NanoBioMatters S.L.

Snapshot [People](#)

COMPANY OVERVIEW

NanoBioMatters S.L. develops, refines, and produces natural and synthetic clays, and nanoadditives to enhance the performance of plastics and bio plastics in various industrial applications. It provides water vapour, aroma components, and hydrocarbon permeation testing services; thermal and mechanical analysis of plastics and films; and consulting and counseling services for the packaging industry. The company's products are used to enhance thermal, mechanical, barrier, and fire resistance properties of commodity petroleum-based plastics, such as PE, PP, PET, EVOH, PA, EVOH, and PK, as well as of bio polymers, including PCL, PLA, PHB, proteins, and polysaccharides. It serves packaging and fo...
