

## NANOBIOMATTERS IS LISTED BY NSF INTERNATIONAL: THE PUBLIC HEALTH AND SAFETY COMPANY™ CERTIFIES BACTIBLOCK®

The International Food and Water Safety Certification Body has tested and certified BactiBlock®, the silver based antimicrobial additive patented and manufactured by NanoBioMatters. NSF is a World Health Organization Collaborating Centre for Food, Water Safety and Indoor Environment.

NanoBioMatters is listed by NSF International to certify health and environment safety in products such as the silver based antimicrobial BactiBlock®.

### What is NSF International:

NSF International is an accredited, third-party certification body that tests and certifies products to verify they meet the public health and safety standards. The NSF Mark is respected by consumers, manufacturers, retailers and regulatory agencies at the local, state, federal and international level.

NSF International was founded in 1944 as an independent, not-for-profit American organization to protect the food, water, and health on a global scale.

### NSF Registration for BactiBlock®

BactiBlock is an antimicrobial eligible for NSF Nonfood Compounds Registration.

The NSF standard includes all compounds used in and around food establishments (nonfood compounds), such as disinfectants and lubricants, and those used for pre-processing of food proprietary substances.

**NSF Registration assures inspection officials and end users that BactiBlock® formulation and labels meet appropriate food safety regulations.**

Products complying with these requirements are identified in the online NSF White Book™ Listing of proprietary substances and nonfood compounds. Products are also permitted to carry an NSF Registration Mark on their product label.
